

Bird Feeder

You will need:

Bowl

String

Wooden Spoon

Empty egg box or yoghurt cartons or pine cones

Ingredients:

Lard or vegetable suet

Any of the following:

Bird seed

Left over cooked rice

Cereals

Breadcrumbs

Dried fruits

- ◆ Melt the lard in your bowl.
- ◆ Mix in your choice of foods from the list above
- ◆ Stir it in well and make sure it is all mixed together.
- ◆ Cut some lengths of string and lay them inside the egg box or yoghurt pot—leave a long tail so you can hang them up.
- ◆ Fill the container with your food mix.
- ◆ Put in the fridge until the mix sets hard again.
- ◆ Hang from a tree and watch the birds feed.

You can also just make balls from the mixture and hang them or pop them on a bird table or pop them in an old net, like the ones you get oranges in, and hang that from the tree.

Have a go and see who comes for lunch!
